CASE STUDY
PRO ISP AS

Local Cloud » SaaS Managed Email Security in the cloud » Incoming Filter » Outgoing Filter » Email Archiving » API » Clusterable » Synchronized » Scalable

Because of the critical threats posed by unwanted emails, many companies opt for email security solutions, however, not all of them can keep up with the trends in spam. This leads to legitimate IPs becoming blacklisted, which, in turn, leads to valid emails being blocked and considered untrustworthy, and huge downward surges in productivity, as manually getting rid of spam is a tedious and long task. SpamExperts provides professional email security solutions with an industry leading filtering accuracy rate of of nearly 100% and with close to 0 false positives - available in the highly redundant Hosted Cloud or via a Local Cloud solution directly deployed on your (virtual) hardware.

Quick Read

PRO ISP was established in 2002 and, today, is one of the fastest growing providers of Web Hosting, SSL certificates, virtual servers, Hosted Exchange and domain names in Norway.

PRO ISP aims to deliver stable and secure solutions at competitive prices to individuals and businesses and to technical and non-technical users. Continuous standardization and automation of services ensures that all customers receive the same high quality experience 24x7x365.

For more information, please visit the official website at https://www.proisp.eu.

Challenges

PRO ISP was offering SpamAssassin to all of its users, but the open-source tool didn't manage to efficiently block spam. For some of the Norway-based company's clients, SpamAssassin wasn't accurate, and, more often than not, blocked valid emails. Following a meeting at a WHD event, PRO ISP found SpamExperts services to fit like a glove.

Customer profile

Company	PRO ISP AS
Location	Norway
Industry	Web Hosting
Number of filtered domains	2,500 domains Incoming 5,000 domains Outgoing
Products in Use	Local Cloud, Incoming Filter, Outgoing Filter, Email Archiving
Website	www.proisp.eu

Implementation

The SpamExperts team monitored the implementation process round-the-clock and had a huge helping presence during all of the installation phases. Everything developed without a hitch, and the SpamExperts SaaS was ready to block spam in no time.

Benefits

As soon as the Incoming Filter & Outgoing Filter products were deployed in the Local Cloud, spam started to dwindle. Via the Local Cloud, SpamExperts built a sky-high wall of filtering in front of PRO ISP's infrastructure - the Incoming Email Filter protects user emails from spam and malware while the Outgoing Email Filter assures that the IP reputation remains strong.

Target Reached

"SpamExperts works excellent as a premium filtering solution for our largest web hosting packages and Hosted Exchange solution. Many of our clients upgrade their hosting solely to get SpamExperts spam filtering. Clients using SpamExperts are having substantially less spam-related problems than clients not using SpamExperts," says Jon Eivind Malde, PRO ISP AS CEO.
